

# Digital Exchange acquires Napier IT Group

## Acquisition of Napier IT Group Limited

**Strategic Corporate Finance advised Digital Exchange Limited, the Sheffield based total technology solutions provider, on the acquisition of Napier IT Group Limited.**

Digital Exchange specialises in voice and data connectivity solutions, IT support, telecoms, cabling and dictation technologies. The acquisition of Napier enhances the group's IT support offering and gives Napier's customers access to the group's full range of services.

Andrew Coates and Greg Barker of dealmakers Strategic Corporate Finance advised Digital Exchange on the acquisition. Andrew Coates said "This is a great deal for Digital Exchange and for Napier's customers and keeps Digital on course with their ambitious growth plans".

Nick Cotton, Digital's Managing Director, said "There are great synergies between Napier and Digital. It's very much business as usual for Napier's customers; they will continue to be serviced by the same technical consultants. However, supporting all of that will be the larger infrastructure and technical expertise within Digital Exchange, plus a broader range of ICT-based products & services".
