

# Contractor Company Energised by New Ownership

## Disposal of Walter Robinson

**Strategic Corporate Finance provided deal advice in respect of the disposal of an electrical contracting company to its management team.**

The company is based in Yorkshire and employs around 50 people. It provides electrical contracting and engineering services to clients throughout mainland UK and operates across a broad range of industry sectors including distribution, offices, hospitals and schools.

The management team has a number of opportunities to grow and develop the business. The team members, who were not shareholders previously, can now explore and pursue these growth opportunities and enjoy the associated future rewards of owning a stake in the company.
