

Software Business Logs on to Buy-Out

Management Buy-out of IMS (GB) Limited

We recently advised a management buy-out team led by Steven Kay on the successfully completed acquisition of IMS (GB) Limited.

Through its core Uniplan product, IMS specialises in the provision of integrated software solutions to customers in the manufacturing sector.

We advised on all aspects of the buy-out and were also successful in securing funding for the transaction, which included an element of venture capital support.
