

Successful Wrap for Funding Deal

Fund Raising for Wells Plastics Limited

We raised a finance package for specialist plastics additive company, Wells Plastics Limited, providing capital for future growth & the buy-out of Lloyds Development capital.

We advised the management team, led by David Nelson .

Wells is an independent specialist manufacturing business which focuses on providing technical solutions to the plastics processing industry worldwide, currently operating across two sites in Stone.

Despite a lot of negative sentiment in the market and media at the moment, this deal demonstrates that good management teams in good commercial enterprises can attract funding to support their strategic objectives.

We were able to conclude an imaginatively constructed leveraged transaction in a measured and timely fashion to suit all engaged parties.
